

Polar Panoramic Step By Step Instructions

Step 1: Open Panoramic

Step 2: Resize

Select Image>Image Size

Uncheck 'Constrain Proportions' and set the "height" to the same value as your "width".

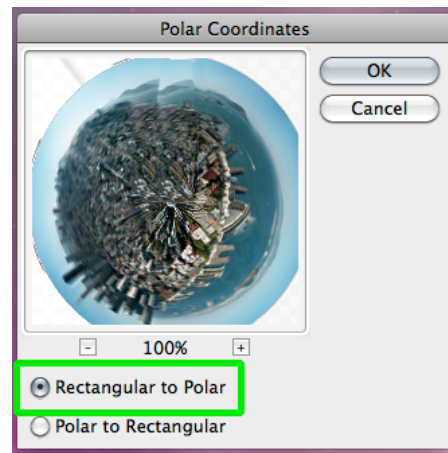

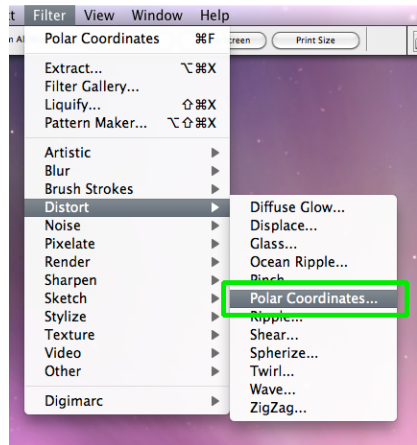

Step 3: Rotate 180 degrees

Image>Rotate Canvas>180

Step 4: Apply the Polar Filter

Choose Filter > Distort > Polar Coordinates

In the dialog box, select the **"Rectangular to Polar"** setting.

Step 5: Rotate and clean up

Rotate the planet to your liking, **adjust the contrast and colours**, clean up the sky and the edges where the left and right border of the image came together. (The clone stamp may be handy here.)
